

# Trinh Bao Tram

## Developer Intern

### Career Objective

#### Introduction

My name is Trinh Bao Tram, currently a final-year student majoring in Information Technology at HUTECH University. Throughout my studies and self-learning journey, I have developed a strong interest in Software Development. I also have experience working with basic testing activities such as analyzing requirements, designing test cases, using SQL, and sending API requests via Postman, which has helped me better understand the complete software development lifecycle.

#### Interest in AI & Motivation

Recently, I have been exploring AI tools and applications in software development. I believe that in the near future, developers will not only write code but also need to collaborate with AI to improve productivity and create smarter solutions. This inspires me to seek an opportunity to work in a software development environment that applies AI, where I can learn, grow, and contribute effectively.

#### Short-Term Goals (6-12 months)

- Learn and adapt to real-world software development workflows.
- Improve programming skills, problem-solving abilities, and logical system thinking.
- Strengthen teamwork and communication skills in a professional environment.
- Contribute to building and improving features in actual projects.

#### Long-Term Goals (2-4 years)

- Become a professional Software Developer capable of handling end-to-end development tasks.
- Expand my knowledge in AI and Machine Learning, with the ability to integrate AI features into software products.
- Grow into a reliable and valuable team member who can contribute to key project components.

### Education

#### Ho Chi Minh City University of Technology

#### Bachelor of Information Technology

2022 - Present

Current GPA: 2.9

### Skills

#### Basic knowledge of Python, Java, and PHP.

#### Understanding of OOP, database design, and web development.

#### Able to write simple SQL queries for data handling.

#### Experience using Postman, MySQL, VS Code, Git.

### Projects

#### Online Mobile Store Website ( 02/2025 - 04/2025 )

Tester

- Used Postman to test APIs for key functions: registration, login, product search, cart, ordering, payment, and order management.
- Designed and executed 15 test cases using CRUD methods.
- Recorded test results, created detailed bug reports, and proposed solutions for improvement.

Logical thinking, teamwork, and self-learning ability

## Certificates

2025 English Language Certificate  
– CEF Level B1

## Interests

Traveling – Listening to music –  
Cats

### Spa Management Website ( 04/2025 – 06/2025 )

Tester

- Analyzed requirements and designed test cases for functions such as service booking, customer management, product management, and staff management.
- Performed Functional Testing and UI Testing.
- Tested booking – payment – feedback workflows to ensure system stability and accuracy.
- Recorded test results and created detailed bug reports.
